

Novia Zulma

Network & Software Engineer | IT Student

+62 877 4805 6009 | noviazulmaa@gmail.com | [linkedin.com/in/novia-zulma/](https://www.linkedin.com/in/novia-zulma/)

Professional Summary

A Computer Science student specializing in network infrastructure, server administration, and software development. Possesses strong practical experience in configuring networks using Cisco and MikroTik, as well as experience designing highly reliable distributed server infrastructure (High Availability) through a Proxmox Cluster project integrated with Ceph Storage. Backed by application development skills using Laravel and React, ready to contribute to managing and optimizing reliable, efficient, and innovative technology infrastructure.

Education

POLITEKNIK CALTEX RIAU

Bachelor of Information Technology

Indonesia

GPA : 3.71 / 4.0 (5th semester)

Expected Graduation : Oct 2027

Relevant Coursework : Computer Networks, Network Infrastructure & Security, Operating System, Cloud Computing, Server Administration, Software Engineering, Web Programming, Database Management Systems.

- Awards : Silver Awardee in the Innovation Category at GINECO 2024.

POLITEKNIK MERSING JOHOR

Student Exchange Program

Malaysia

Relevant Coursework : Computer Networks, Cybersecurity

Oct 2024

- Competed in a mini Capture The Flag (CTF) cybersecurity competition during the mobility program.

SMK Negeri 5 Pekanbaru

Vocational High School Diploma in Network & Computer Engineering

Indonesia

May 2023

Relevant Coursework : Computer Networks, Network Infrastructure, Server Administration, Operating System

- Awards : 1st Place Winner in the Networking Category - Information Technology Olympiad X (2022)

Work Experience

PT SUMIDHAZ PERMATA BUNDA (DASHNET)

Network Operation Center Intern & Technical Logistics Intern

Indonesia
August 2023

- Network Operation Center (NOC) Role :
 - Monitored network infrastructure stability in real-time to detect and respond to connectivity issues.
 - Assisted in troubleshooting Cisco and MikroTik equipment to maintain optimal internet service uptime.
 - Coordinated with field technicians by providing technical data to streamline on-site network restoration.
- Technical Logistics Role :
 - Managed and prepared hardware inventory (routers, switches, cables) based on daily deployment needs.
 - Tracked inbound and outbound equipment to maintain stock accuracy within the logistics system.

University Project

Final Project : High Availability (HA) & Fault Tolerance on Proxmox Cluster

- Configured a 3-node Proxmox VE cluster to build a High Availability infrastructure.
- Integrated Ceph Storage to ensure synchronized data replication and fault tolerance.
- Tested system resilience via abrupt power loss and Ceph OSD hot-unplugging.

LACOF Admin Dashboard Web Application

- Developed the LACOF dashboard admin using React JS to provide an intuitive user interface.
- Connected front-end components with back-end services for real-time system management.
- Created functional components to monitor and manage application data efficiently.

Certifications

- Mikrotik Certified Network Associate (MTCNA) - Mikrotik | Jul 2025 - Jul 2028
 - [Verify Certificate](#)
- Ethical Hacking Essentials (EHE) - EC Council | Jul 2025 - Jul 2028
 - [Verify Certificate](#)
